

# SIAMUR RAHMAN NILOY

Full Stack Web Developer | CSE Student

01340954537 | [\[email protected\]](#) | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

## PROFESSIONAL SUMMARY

Second-year CSE student at AIUB. I build web apps with JavaScript, React, Next.js, Tailwind CSS, and Node.js, and I use MongoDB, SQL, or Oracle when a project needs a database. Most of what I know comes from shipping personal and small-business sites — getting them to work well on a phone and a desktop, then cleaning them up so I can actually maintain them. I also practice C++ regularly so the programming fundamentals stay solid.

## TECHNICAL SKILLS

|           |                                                         |          |                                                                            |
|-----------|---------------------------------------------------------|----------|----------------------------------------------------------------------------|
| Languages | JavaScript, TypeScript, C, C++                          | Backend  | Node.js                                                                    |
| Frontend  | HTML5, CSS3, React.js, Next.js, Tailwind CSS, Bootstrap | Database | MongoDB, Oracle, SQL                                                       |
| Tools     | Git, GitHub, Firebase, REST APIs, Vercel, Cloudinary    | Concepts | OOP, DSA, Responsive Web Design, Database Management, REST API Integration |

## PROJECTS

### VERIN Group — Business & Brand Platform

A business site for a growing multi-category brand. Clean presentation, consistent layout, and easy to use on a phone.

- Designed and built responsive pages covering different business categories and services.
- Broke the UI into reusable components so adding a section later does not mean rewriting the page.
- Laid out product and service blocks with the same spacing and structure so the site reads as one brand.
- Kept headings and page structure straightforward for SEO, and checked how the layout holds up on smaller screens.
- Handled images through Cloudinary and deployed the site with a normal Vercel workflow.

### E-Commerce & Product Showcase

Product websites for personal and small-business use, built with modern frontend tools.

- Built responsive product listings with category browsing and a simple search.
- Focused on how products are shown — readable details, clear layout, no extra clutter.
- Connected pages to an API or database when a static page was not enough.

### Flutter / Mobile Applications

Small Flutter apps with structured screens, reusable widgets, and local storage.

- Built a notes flow with create, edit, and pin, plus a PIN lock for basic access control.
- Kept navigation simple and stored data locally, with a project structure that is easy to follow.

## PROGRAMMING & PROBLEM SOLVING

I practice programming problems in C++ on a regular basis. That includes data structures and algorithms, the common sorting methods (bubble, selection, insertion, merge, counting), binary search, recursion, and matrix work. I use competitive programming as practice — I am still learning, not treating it as a specialty.

## EDUCATION

### BSc in Computer Science and Engineering

2nd Year — Currently Studying

American International University - Bangladesh (AIUB)

HSC — Sheikh Bazlur Rahman College · GPA 4.42

SSC — Firoza Bashar Ideal College · GPA 4.72

## RELEVANT COURSEWORK

Object-Oriented Programming · Data Structures & Algorithms · Database Management · Object-Oriented Analysis & Design · Discrete Mathematics · Computational Statistics & Probability

## LANGUAGES

Bengali — Native  
English — Working Proficiency  
Hindi — Speaking & Listening  
Urdu — Speaking & Listening

## ADDITIONAL STRENGTHS

Problem Solving · Fast Learner  
Self-Motivated · Team Collaboration  
Adaptability · Attention to Detail
